DETAILED ACTION

Claims 1-14 are pending in the instant application.

Response to Non-Final Office Action

Acknowledgment is made of applicant's response and amendment of the claims filed on 9/30/2009.

Claim 1 was rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. This rejection is withdrawn in view of the amendment to the claims.

Claims 1-14 were rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over Claims 1-12 of U.S. Patent Num. 6,392,057B1 ('057 Patent), Claims 1-8 of U.S. Patent Num. 6,465,658B2 ('658 Patent), Claims 1-5 of U.S. Patent Num. 6,891,045B1 ('045 Patent) and Claims 1-14 of U.S. Patent Num. 7,102,012 ('012 Patent).

This rejection is withdrawn with regard to US Pat Numbers 6,392,057, 6,465,658, and 6,891,045. The rejection is maintained with respect to US Pat Number 7,102,012. Applicants argue that claims 1-14 of the '012 Patent do not discuss metering in the azole and phosgene at a specific rate of 1 mol of azole to 0.17 to 0.34 mol of phosgene. This is acknowledged, but is not found persuasive. Claim 1 states that the phosgene is metered in and claim 6 states that it is 0.2 to 0.3 mol of phosgene, which is within the range claimed in the instant claims.

Art Unit: 1626

Although the conflicting claims are not identical, they are not patentably distinct from each other because one of ordinary skill in the art would be able to conduct the instantly claimed process based on the teachings of the '012 Patent. Also, one skilled in the art would have found this variation obvious when faced with prior patents because the same N,N'-carbonyldiazole final product is being claimed. The motivation to optimize the prior process is the expectation that it will yield better results, such as yield, more economical and less byproduct. Unfortunately this is mere optimization and achievable through routine experimentation well within the ability of one of ordinary skill in the art. Absent unexpected results, the instant process is obvious over the prior patented processes. Therefore, the double patenting rejection is maintained.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

Art Unit: 1626

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
